The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 5 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sakaya et al.

As noted in the previous Office Action, Sakaya et al. show a uniform thickness helical tube profile that meets every limitation of amended claim 5, showing "at least one passage" and having the alternating profile and uniform width recited in the claims (see Fig. 1). The recitation that the profile of the tube is "extruded" fails to distinguish, as the rolled and shaped tube profile of Sakaya et al. would be structurally indistinguishable from a helical tube profile formed via extrusion. See MPEP 2113.

Claims 1-4, 6, and 7 are allowed.

Applicant's arguments with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the

advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
